### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the closest prior art of record, namely the Ellis patents, fail to teach or suggest the application of a cationic polysaccharide to treat a hydrogel biomaterial to inhibit the ability of the biomaterial to sorb the cationic antimicrobials. Applicant pointed out in the response of 2/6/2004, that the material asserted by the Examiner in the Ellis patents for preventing protein deposits, is not the same as that being applied in the instant claims and would not therefor intrinsically function to inhibit the ability of the biomaterial to sorb cationic antimicrobials. It is noted that Ellis recites cationic polymers but merely as common constituents of sterile contact lens solutions. Neither reference teaches the ability of a cationic polysaccharide to inhibit the ability of a hydrogel biomaterial to sorb cationic antimicrobials, as claimed in the instant claims and supported by evidence in the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
